IV. Noncompliance Summary:
The Buhl processing facility has been noncompliant for total phosphate concentration during the entire year of 2012. The reason for the noncompliance is that the treatment technology has changed and the current permit does not reflect the treatment technology. The treatment technology change reduced the flow of non-contact water into the treatment processes with the goal of reducing the flow and subsequent loading of phosphate into the environment. The byproduct of the reduced flow is an increase in concentration. The goal of reduced loading to the environment has been met.
